A flood bag that ships flat and weighs 230 grams — until water touches it. The super-absorbent polymer core swells to a 20 kg sandbag in 3–4 minutes: no sand, no shoveling, no pre-storm labor. Stack like sandbags — overlapped seams, two layers for a standard doorway, each layer ~12 cm high.

Fresh water only. SAP cores do not activate properly in salt or brackish water — for coastal storm surge, use hard barriers and keep bags for rain and inland flooding. Bags are **single-event products**: once activated they stay swollen.

Specifications weights ±5% · confirmed with quotation

	TB-FB400 (no handle)	TB-FB436 (with handle)
Dry size	400 × 600 mm	400 × 360 × 150 mm
Dry / deployed weight	0.23 kg / 20 kg	0.25 kg / 20 kg
Activation · deployed height	3–4 min · ~12 cm	3–4 min · ~12 cm
Packing	5 per vacuum bag · 50 per carton	4 per vacuum bag · 40 per carton
Carton (NW / GW)	50×36×42 cm · 13.5 / 14.5 kg	50×36×42 cm · 14.5 / 15.5 kg
Materials	PP non-woven shell · SAP core (non-toxic) · colours white / black	
Shelf life	3 years vacuum-packed, stored cool & dry, off concrete floors	

How many bags per job

- Standard doorway (0.9 m): **5–6 bags**
- Double door / single garage (2.4 m): **9–11**
- Double garage (4.9 m): **18–22**
- Whole-house entry points: **30–50**
- Basis: TB-FB400 laid lengthwise, two layers, ~15% overlap — reuse this table in your own sales material once you stock the line

Honest boundaries

- For low-level water: door gaps, thresholds, low points, leak response
- Not for knee-high water or structural protection — hard barriers outperform any bag
- Near neutral buoyancy when swollen: fast-moving water can shift what sand holds
- Shelf life ≠ warranty: bags are warranted to conform to spec on arrival; activation is single-use by design

Ordering & private label

- **MOQ 300 bags** (six cartons); pallet and container tiers above — consolidates with gates and boxwall in one container
- **Private label from the first order**: printed shell, your carton artwork, your instruction insert — no mould cost, just print
- **Samples**: paid sample carton plus freight; fee credited against your first order
- **Payment**: 30% deposit, 70% before shipment (T/T) · **Lead time**: in-stock ships 2–7 days; print runs confirmed at quotation
